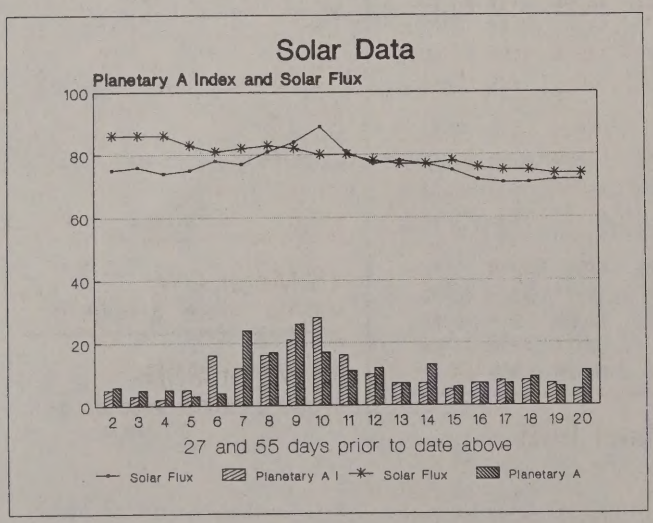
Propagation Watch

Solar activity continues to be very low, with solar flux hovering near 70. This low level of solar activity puts downward pressure on maximum useable frequencies (MUFs), despite some expected seasonal improvement as we approach the fall equinox. The highest band open for DX has been 17 meters, with 20 meters continuing to be the main DX band.

The very low solar activity has a positive side: a very quiet geomagnetic field. This has opened some of the less-common DX paths, including long path on 40 meters, and polar paths. Polar-path signals are weak, but copiable, and they provide some variety otherwise lacking at such low sunspot counts.

While solar flux and MUFs are predicted to remain low, we expect an increase in geomagnetic activity Sept. 6-12, due to a recurrent coronal hole. Otherwise look for conditions to be similar to those of the past few weeks. When the K index is at 2 or less, check out the lower bands. 30 meters remains an under-used band, with good signals and limited competition. Good hunting!



DXAC Vote Results

The DXAC (DX Advisory Committee) has voted 8 to 7 to **reject** a proposed revision to Section I. 10 of the DXCC Rules to reinforce rules against the unethical action of making a contact for DXCC purposes with a call sign other than that issued to the operator. The majority felt that this could adversely affect club and other multi-operator stations—including DXpeditions. The minority felt that this rule change was necessary to prevent observed abuses.

The DXAC also **rejected** (by a 14 to 1 vote) a petition for new DXCC country status for the Turkish Republic of Northern Cyprus (TRNC). DXAC members stated that the TRNC did not meet DXCC Criteria Point 1, Government.

In a third matter, the DXAC voted 11 to 4 to set a **minimum size** for new DXCC countries. The DXAC recommendation says: "A DXCC country shall be a natural land mass of a size adequate to support a reasonable Amateur Radio operation. In the case of islands, the surface shall be dry at all times during high tide, and the physical characteristics may not be changed or modified. This includes the use of man-made operating structures. Each case will be judged on its own merits. Implicit in the recommendation is that operation from an island must take place from the surface of that island." The minimum-size recommendation now goes to the Awards Committee for action.

ZD9SXW Video

Roger Western G3SXW operated from Tristan da Cunha Island in October, 1993, making 23,300 CW contacts on a one-man DXpedition. His professionally produced 12-minute video shows the journey, the island, and operating the pile-ups from the DX end. It is now available in the USA, at cost. Please send a check for $14.95 to Jack Reed WA7LNW, 16423 North 54th Avenue, Glendale AZ 85306.

W9DXCC Convention and Banquet

The W9DXCC Convention is Saturday, Sept. 10, at the Holiday Inn Holidome in Rolling Meadows, IL. The day-long program includes the **3Y0PI, E31A**, and **BS7H** DXpeditions, VS6WO, IOTA with W4BAA, W0AIH's contest station, K5FUV on DXCC matters, W9BRD, N7NG, and more. For more information, contact Bill McConnell N9US at 708-397-9593. For hotel reservations, call the Holiday Inn at 708-259-5000.

W5 DX Bash

The fourth annual W5 DX Bash is Saturday, Oct. 1-Sunday Oct. 2, at the Edwards-Fulgham Ranch on Lake Buchanan, near Austin, Texas. Registration is $20; send your check to W5 DX Bash, 3801 68th St., Lubbock TX 79413. For more information, contact W5KFT at 806-745-3692 (office) or 806-799-5783 (home).
